PROFESSIONAL SUMMARY

Focused & Passionate Civil Engineer with knowledge, skills and experience in construction and civil engineering works. Focused, enthusiastic and strategic thinker; Excellent Communication skills; Team player; Pro-active & self-starter; Ability to partner closely with business leaders, C – Level executives and excel in developing and monitoring high focused team that successfully meets the company's objectives. I am currently looking for a challenging and dynamic business environment where I can engage in my professional skills & experience, compatible with the tasks at hand and to maintain a results-oriented Career Development as I help in achieving company goals.

SIGNATURE COMPETENCIES

- Engineering Drawing
- Surveying
- Theory of structure and Structural Design
- Fluid Mechanics and Hydraulics
- Soil mechanics and Foundation Engineering
- Irrigation Engineering
- Highway Engineering
- Cocreate Technology
- Public Health Engineering
- Transportation Planning and Engineering
- Project Management
- ISO, AASHTO, ASTM Eurocode, Code of Practice and British Standards Compliance.
- Engineering software: AutoCAD,Revit, Civil 3D, ArchGIS,CROPWAT, CLIMWAT, Matlab and Abaqus
- Spread Sheets: MS word, PowerPoint and Excel
- Computer programing language: Python, C++
- New product development Excellent communication skills
- Teamwork
- Reporting and Presentation

WORK EXPERIENCE

HITECH FABRICATORS – 24 BUSIA ROAD, NAIROBI:
Position: Production Coordinator
Period: March 2020-August 2020
Overall, Purpose: Responsible for monitoring and participating in quality production of steel products.

Duties and Responsibilities:

- Developed and managed production schedules to meet customer deadlines, ensuring efficient use of resources and minimizing downtime
- Investigated all customers complains and ensures corrective actions is taken to avoid reoccurrence.
- Monitors all production operations to ensure that they meet specifications and standards.
- Inspected, and measured materials and products being produced.
- Removed all products and materials that failed to meet specifications and standards.
- Documented inspection outcomes by completing detailed reports and performance records.
- Approved incoming materials by confirming specifications, conducting visual and measurement tests, rejecting and returning acceptable materials.
- Approved in-process production by confirming specifications and communicating required adjustments to production supervisor.
- Maintained a safe work environment by enforcing company safety protocols.
- Prepared detailed production reports analyzed key performance indicators (KPIs), and recommended adjustments to improve operational efficiency.

Key Achievements / Highlight:

- Experience in steel cutting equipment and machines.
- Steel fabrication designs and quality measurements.

MATERIAL TESTING AND RESEARCH DIRECTORATE- MINISTRY OF ROADS AND TRANSPORT, MACHAKOS ROAD INDUSTRIAL AREA, NAIROBI:
Position: Industrial Trainee
Period: Jan 2023-April 2023

Duties and Responsibilities:

- Receiving materials from clients.
- Recording and arranging the materials on the shelves for easy identification.
- Performing laboratory tests and analysis on the ready materials.
- Keeping records of the results of the experiments done on the materials.
- Cleaning up the test equipment and the place after the experiment.
- Disposing of the junk from the experiment away from the lab.
- Collecting the samples for tests from sites.
- Attending regular laboratory departments meetings.
- Writing laboratory reports and research assays on the test results.

Key Achievements / Highlight:

- Learned how BS and other standards are followed in the testing of materials for construction and civil engineering works.
- Experienced how safety, integrity and professionalism are mandatory in the laboratory environment.

AMANTA CONSTRUCTION COMPANY LTD-WABERA STREET, NAIROBI:
Position: Industrial Trainee
Period: Jan 2024-April 2024

Duties & Responsibilities

- Conducting physical inspection of the site to identify and understand the site conditions.
- Performing in- situ tests such as SPT to assess soil strength and other parameters
- Location and mapping of the existing utilities.
- Establishing levels and benchmarks for construction work.
- Preparing detailed design drawings and plans.
- Conducting material tests to ensure that the materials used met the required standards.
- Determining the quantities of materials for construction.
- Supervision of the construction works.
- Preparing progress reports and work schedules.

Key Achievements / Highlight:

- Learned the site inspection and supervision is carried out in construction project.
- Experience on determination of quantity of materials for construction and quality assurance tests.
- Experience in construction project management.

ONSTIER CONSTRUCTION LIMITED-NAKURU:

Position: Machine Operator
Period: July 2025-Dec 2025

Duties & Responsibilities

- Prepare the road surface and clean it before spraying.
- Use the hand spray wand to apply the bitumen, tack coat, or prime coat.
- Maintain the uniform spraying at the required rate.
- Monitor the temperature of the bitumen before and during spraying.
- Regulate the spray pressure and flow to prevent over- or under-application.
- Inspect the hoses, nozzles, and valves before starting the job.
- Clean and maintain the equipment used for spraying after the job is done.
- Adhere to all the safety guidelines when dealing with hot bitumen.
- Maintain coordination with the paver, roller, and crew for smooth operation.

Key Achievements / Highlight:

- Assisted in the achievement of consistent and uniform application of the bitumen, which resulted in the prevention of waste and surface defects in the course of executing the road projects.
- Ensured zero safety incidents while handling hot bitumen through the strict adherence to the use of PPE and the overall safety protocols at the sites.
- Assisted in the timely completion of the project through effective coordination with the paving and rolling crew.

EDUCATION:

- 2025: Bachelor of Science in Civil Engineering,Second Class Honor- Lower division; Jomo Kenyatta University of Agriculture and Technology
- 2018: Kenya Certificate of Secondary Education, A- minus; St. Benard's Otaro High School

AWARDS/ MERITS AND RECOGNITION

- Certificate of recognition for participation in the Heroes for Change Programme 2019 reaching 1056 person through the Blue Band Good Breakfast Challenge
- Letter of Appointment to the Electoral Commission as a commissioner to oversee JKUSA Election 2021
- Certificate of merit for achieving second position in Physics exhibit in Homabay County Science Congress held on 20th June 2017.

INTERESTS:

- An all-round Project Engineer and Analyst, Enjoys Travelling, Watching Football, Reading Journals &Networking
